1Content:

2.1 Introduction:

A world of invention what is an invention:///

Material and step task operational making creation

- What time is an invention:
- The first inventors:
- - keeping time lock clock:
- Putting wind to work windmill:
- Speeding word print:
- The first invention:
- It revolution wheel with the wind soil:
- Keeping wings:
- The universe revealed telescope:
- Spreading the word printing:
- The universe revealed:
- Power in modern age:
- Camera:
- Transport connected:
- powers station:

- Sound ideas museum:

- Keeping connecting laptop:

- Keeping diver submarine:

- Freedom machine: automobile:

- Lighter than air airship:
- Talking to the skies radio:
- Quick thing completed out of this world rocket:
- Kindest cuts surge:
- Access control lock:
- Access control lock:
- Beater body bionic:
-
- 1.3 Word invent comes from the Latin for to find or come upon button is very different to discovery discovery uncovering something that already exist but inventor means creating something new that having image
- Innovation: re ideas
- Genius: Leonard divicine machine
- 1timeline ld. Rome china wind water machine technology
- of invention prehistory; humane invented numerous tools that power oil lamb bow age bronze and iron age, 35000 the ancient word Rome china
- 500-500 ancient world middle mechanical gun power printing press 500-1450 the middle ages,
- 1.4 pre scientific revolution 500-1550 middle age
- Newtown reflecting telescope Microsoft, Pascal ages
- Microscope Pascal 1450-scientific revolution the age of machine 1700 -1870
- Machine electricity and modern electricity early 1900 saw three inventions that would cars and aero plane electrical generator power automobile telephone radio
- Automobile telephone radio
- 1870-1950 electricity and modern world digital age 1870-1950 information into a series of numbers and process it lightning speed from electronics computer bionics, rocket maglev

- 1.5 great invention first civilization stone age ancestor to survive corps animal chasing maven cloth jeweler clay pottery flaunt axe head fluent swishing Spean,

- Invention thing component the equipment the allay imagine natural mentor society Greco philosophy not talking nice covid invention job in discovering science is talking false imagine fiction working sophistical that android in science is like this in education resulted machine ,,

Master abstract:

Master knowledge ,

Master overview backlog master

Master visibility

-

1 **Trademark**
Knowledge:
Master
-how things are made
- explain many different ways of making the things every days
- content:
Material and step task operational making

Building a home:
- On the road first:
- What cooking:
- Thirst work:
- Warm and:
- Comfortable poetry is plastics:
- Iron and steel
- Small wonders:
- Small wonders:
- Talking picture:
- Read about:
- The sound about:
- The sound of music:

- What is glass made frame how do you make handmade paste making plans building the walls plumbing electricity supply

Building a skyscraper:

-

Knowledge masters:

How things works

Mechanical helpers how do everyday things in the home such assistance,

Electricity in the home electricity: power many households work such assistance electricity in the home electricity power many households // Material and step task operational making

-
- Making music:
- Clocks watches:
- Engines and gear:
- Vehicle safety and security:
- Vehicle safety and security:
- Flying machines:
- Ships and boat computers:
- First time building Europe counting:
- Computers:
- Keeping in touches:
- Record sound and medicine in to :
- How do rocket and satellite :

Smart kids fund experiments to do and learn science learn science step by steps instruction

Trading marks

- **Instruction:**
- **Fascination**
- **Content**
- **What you need starting needling starting your science lab**
- **Rocket balloon sequence:**

Forcing action:

-
- Bottle diver make a model parachute:

Sky diver make a model:

-

- floating test: why do same things floating:

-

Papers aero plane make an aero plane that readily files:

-
- Pear aero plane make that really files:
- Make pepper helicopter that make spinning flying:

Action how does air make thing fly:

-

Bridge shapes find how bridges stay up:

-

Blustering act make an acrobatic clown:

-

Seeing sound seen sound vibration:

-

Phone a friend:

-

Singing glass make a noise with a glass:

-

Bottle xylophone make music looking at light how does light behave:

-
- Bending light seen how light how does light behave:

Bending mirrored writing tricks your eyes a brain:

-
- Shadow puppets make your own spooky shapes,
- Optical:

Picture mixer: turn two picture into one:

-

Mixing colures: mix points to create news colors:

-
- Pin and sweet colures:

Find colures in pens and sweep:

-

Changing states: solids liquid, and gases:

-

Liquid next: do all liquids mix together:

-

Solid test which solids dissolved in water:

-
- Vinegar volcano: watch a volcanic:
- Acid test: are things acid alkalis
- Magic milk make a color full milk

- Giant bubbles make huge water bubble magnet test experiment with magnetics

- Floating compass find nord balloon power explore statistic electricity radio wave transmission

- Pretty flower

  Make you will need large glass pepper scissor pan:

-

  Trace or copy picture:

-

  6 piece of book:

-

Radio wave transmission, signal attach the second piece of wire for other

Touch the two free end wired log you should radio, spark signal current, switch select am band

- how things work

4. written and tested by teachers illustrated, 365 days' science experimental find out how much fun be through hundreds of fascinating experiments:

4.1 - astronomy task step trading, sun and us relationship sun earth and the moon:

Material and step task operational making

- material: one large balloon model lying clay , wire , string tapes, plastic bottle , show :

- step: make a turn bang blow up a long balloon as attach another price wire happing

4.2- gravity:

Material elastic ball

Step doing

-4.3 gravity pulls making gravity down seen inside a box shape of earth

- material step

4.4 season, tides angled light :

Material steep

Greeting chip

Images of the sun :

- Sun pots :
- Moving sun :
  Material and step task operational making
-
- Sunset in box
- Different moons / phase moons
  Moon gazing :
  Material and step task operational making
-
  Your weight on the moon :
  Material and step task operational making
-
  Reflective telescopsorites crater:
  Material and step task operational making
-
  Meteor bu:
  Material and step task operational making
-
  Refracting telescopes :
  Material and step task operational making
-
  Gazing at stars:
  Material and step task operational making
-
  Start motion black holes :
  Material and step task operational making
-
  Start gazing splitting light:
  Material and step task operational making
-
  Making a speeding starts :
  Material and step task operational making

- Spaces clouds / your own :
- Beed room night :
  Material and step task operational making
- Space clouds your owner:
  Material and step task operational making
- Beed room night:
  Material and step task operational making
- Potato asteroids :
  Material and step task operational making
- Greenhouse effect :
  Material and step task operational making
- Orbiting the sun rusty :
  Material and step task operational making
- Our solar system:
  Material and step task operational making
- Uranium and sun:
- E.t rocks :
  Material and step task operational making
- Mater burnout:
  Material and step task operational making
-
- Rocket launcher, working in space
- Material and step task operational making
-
- Robot arm:

- Showdown in dances travel to the room eating in space

- ---

- Astronaut suite :

  Material and step task operational making

- Super hearing :
- Material and step task operational making

- Flying in space signals and satellite :
- Material and step task operational making

- Orbiting and satellite :

- **<u>Biology :</u>**

- Classifying living thins :
- Material and step task operational making

- Min greenhouse make a mini greenhouse grow plants :
- Material and step task operational making

- Sweating plants step material :
- Material and step task operational making

- Magic balloon use use gus :
- Material and step task operational making

- Barney banana material :
- Material and step task operational making

- Fruit or vegetable material when :
- Material and step task operational making

- Ginger :
- Material and step task operational making

- Lemon floatiest :
- Material and step task operational making

- Mold colored modules different floods :
- Material and step task operational making

- Making a composite bin :

- Material and step task operational making

- Making a composite bin :
- Material and step task operational making

- Make a comp bin make a comp bin to keep at home steps composition is my home :
- Material and step task operational making

- The oldest tree how can you measure the age of three :
- Material and step task operational making

- Gasses :
- Material and step task operational making

- Bank rubbing :
- Material and step task operational making

- Bank detective :
- Material and step task operational making

- Leaf rubbing :
- Material and step task operational making

- Graze leaves material peppers pencil tab step experimental :
- Material and step task operational making

- Three cyclopedia make a book photo of :
- Material and step task operational making

- Pressed leave flowers oldness peppers heavy book freshly picked :
- Material and step task operational making

- Making pot poured :
- Material and step task operational making

- Colorful celery :
- Material and step task operational making

- Stem less flowers :
- Material and step task operational making

- Prest :
- Material and step task operational making

-

- Salty bean spnouts :
  Material and step task operational making

- Grass s leave flower oldness
- Material and step task operational making

- Peppers havy book freshly prickly :
- Material and step task operational making

- Plants and water :
- Material and step task operational making

- Brow light clear light :
- Material and step task operational making

- Undercover leaves plant from other plan :
- Material and step task operational making

- Salty bean spouts :
- Material and step task operational making

- Grass heads :
- Material and step task operational making

- Is a spider an insect :
- Material and step task operational making

- Buzzy bees :
- Material and step task operational making

- Catching arts make art colony create a news insect leaf eaters :
- Material and step task operational making

- Attract making butterfly :
- Material and step task operational making

- Feeding birds ponds injured wriggling worm :
- Material and step task operational making

- Guard dogs foot print detective find and identify defend animal foot prints make plaster cost :cardboards
- Material and step task operational making

- Stop beach :
- Material and step task operational making

- ----------

-chemistry

[date] experiment [note]

-Rise up: material step make :

Material and step task operational making

- Candy molecules make water H20, co2 make :

Material and step task operational making

-making starch material step :

Material and step task operational making

- carbon very where :

Material and step task operational making

- changing shape :

Material and step task operational making

-colorful sugar :

Material and step task operational making

-cooling down :

Material and step task operational making

- corning goa :

Material and step task operational making

- green slime :

Material and step task operational making

Fast rust :

Material and step task operational making

Material and their uses :

Material and step task operational making

-melt or burn :

Material and step task operational making

-preserving food :

Material and step task operational making

-preserving food :

Material and step task operational making

- the floating egg :

Material and step task operational making

-save our chemical :

Material and step task operational making

-apple :

Material and step task operational making

Mm field apple lemons :

Material and step task operational making

- Milky plastic :

- Material and step task operational making

- Acid or base :

  Material and step task operational making

- Clean cleaner :
- Material and step task operational making

- Disappoint earing act

  Material and step task operational making

- Crystals everywhere :
- Material and step task operational making

- Message :
- Sweaty egg plants
- Material and step task operational making

- Melting ices :

  Material and step task operational making

- Salty ice :
- Material and step task operational making

- Baked ice

  Material and step task operational making

- Baked ice cream :
- Material and step task operational making

- Squishy ice cram :

  Material and step task operational making

- Peppery skinbbly drinking
- Material and step task operational making

-
- Soap boast :
- Material and step task operational making

- Swirly colors :

  Material and step task operational making

- Wax factor :
- Material and step task operational making

- Sweet dissolving :

  Material and step task operational making

- Tile bottle :
- Material and step task operational making

- Volume :
- Will it mix :
- Material and step task operational making
-
- The big ice
- Material and step task operational making
-
- That egg hard bolded :
- Material and step task operational making

- Blowing bubble :
- Fire extinguisher card extinguisher :
- Material and step task operational making

- Light out :

  Material and step task operational making

- Fizzy sherbet
- Material and step task operational making

- Green to red sty brick

  Material and step task operational making

- ---
- **Geology and geography**
- The ancient continent :
- Material and step task operational making

- Making sand stone :

- Material and step task operational making
-
- Making limestone :
- Material and step task operational making

- Making conglomerate rock :

  Material and step task operational making

- At home paleontologist :
- Material and step task operational making

- Missing foot prints search rock search :

  Material and step task operational making

- Rock hunt identify and group :
- Material and step task operational making

- At home volcano, lavacy :

  Material and step task operational making

- Float or sink :
- Material and step task operational making

- Which rock :

  Material and step task operational making

- The amazing FL magnetic rocks
- Material and step task operational making

- Dishing up the crystal :

  Material and step task operational making

- Crystal on an stalactite :
- Material and step task operational making

- Fizzing minerals :
- Making refloating rock n
- Material and step task operational making

-
- Waning for sand :
- Material and step task operational making

- Panning for gold works

  Material and step task operational making

- Sedimentary situation :
- Material and step task operational making

- Watch the is sand :

  Material and step task operational making

- Mapping the ocean floor :
- Material and step task operational making

- Smag alert :

  Material and step task operational making

- Is pollution problem steps :
- Material and step task operational making

Physics

-Home made

Material and step task operational making

See how sound wave can travel things

-What is that noise to :

Material and step task operational making

The match box guitar instrument

Material and step task operational making

Snappy ruler :

Material and step task operational making

- Musically the distance :

Material and step task operational making

-Material :

-Musical :

-Sticking to the outline :

Material and step task operational making

-standing in the shadow :

Material and step task operational making

-reverse need your lenses fixed :

Material and step task operational making

-rainbow light :

Material and step task operational making

-celling round bow :

Material and step task operational making

-color life :

Material and step task operational making

-mighty whiting :

Material and step task operational making

-am upside investigate the bending of light this called refraction filter :

Material and step task operational making

-turning to why combing which parachute :

Material and step task operational making

-turning inside balloon :

Material and step task operational making

-sailing the high season

Material and step task operational making

Failing over: show how energy transferred :

Material and step task operational making

-crater that :

Material and step task operational making

-bounce higher :

Material and step task operational making

Investigate bouncy energy :

Material and step task operational making

Aero plan wing :

Material and step task operational making

-lost my marbles :

Material and step task operational making

-lifting higher :

Material and step task operational making

Ion action make batter :

Material and step task operational making

Lemon :

Material and step task operational making

-electric static:

Material and step task operational making

Investigate the energy of static electricity :

Material and step task operational making

-match box cars show how magnet work solider :

Material and step task operational making

Magnet field material iron filling paper pencil magnetic :

Material and step task operational making

Demagnetizer can destroy magnet unwater :

Material and step task operational making

Acid cassette tape magnet plays reduce

Material and step task operational making

Weather

-measure temperature: make a device that food color :

Material and step task operational making

-clear bottle cold modeling pieces of :

Material and step task operational making

-catching color full rain drops :

Material and step task operational making

-feeds

Water putting or week freezing cold part freezing, :

Material and step task operational making

-make your own lighting :

Material and step task operational making

-your heavy is the wet dry salty rain color weather precipitation :

Material and step task operational making

Freezing liquid :

Material and step task operational making

CABINET MAKING FOR BEGGINERS, ADVANCED,

DRAKE HOME CRAFSMAN'S

Contents:

Chap I the kit of tools:

-joints: Material and step task operational making

- cabinet construction part:

saw chisel and gauze brace and bit plane purpose of the shooting board purpose how plane iron baring and down

-cabinet constructuction part

-veneering and laying: mortise and tena

-drawing cutting lists: side how drawing form slips use door, explanation what is scaling drawing ellipse marks stripe bisect angle join piece compact, glue fitting mirrored frame design bookcase,

Cut list end, long wide the top bottom back feet,

Elevation chief top close to close up view of

-making out etc.

- timber in cabinet work

-glue fitting, etc. typical cabinet design :

--light stool framework elevations tools, piece, legs, rail, stretcher rails, stretcher rails, design section ,

Trolley elevation in part section with main size,

Make toys : design toys ,,

Rock and gem: polishing complete to amateur lapidary

-introduction:

I cutting a pebble in pebble in half diamond blood knop scale pulled motor and drive belt thank and coolants, cutting table and splash guard setting up your machine last minute check cutting,

-cutting slab: the slab saw first slab, blade sharpening and slued cleaning

-grinding and polis hinging a flat surface cost a flat surface cast iron laps other equipment using the lap polishing using yours slabs,

- preforming stone before tumbling gridding machine care of grinding machine care of grandly wheels, grinding you perform using in jeweler making with carbon,

-drilling a hole in a stone

-simple faceting, preforming the stone faceting or forming the stone

- gem collecting the rules for success ingeniously rocks summary of rocks talk, look form summary of likely gemstone,

-buying stones and fitting selection of imported rough rock available from

- rock shops and lapidary club, supplier

Introduction earth movers is , blade bowls , bucket is used excavating or digging up material such , soils rock or dirt ,,

Sizes works, big

-energy from oils and gaze drilling in deep water,

Rigs 500 meters, semi-submersible, a drilling ship,

--Water ecology project, water planet activity

Water cycle raining, from cycle , ramming waters , still a drinking of water sewers and swage,

-sunlit seas, pressure

Chemical industry:

Natural processor material

Material and step task operational making

-Requirement or processing and synthesis

-supplied industrial plastic, dye soap, detergent

-product tone sold court benzene

Chemical reaction, pvc

- Chemical engineering lab
- Take process solve problem
- Pilot plant scale , plastic
- Silicon chips,
- Digital watch

...THE LOCAL RADIO STATION

A new radio local station

Material and step task operational making

What is commercial radio:

Preparing the breakfast show

-the microphone

-the news room

- program planning:

The advertising departs

- Making a advertisement
- - the engineering department
- The managing director
- First commercial radio,
- - local radio today. control of advertising

Modeling product appears on pepper

Simple shapes and guide

- Resource task :
- Grids layout circuit :
- Board circuit :
- Material for rapid modeling plastic :
- Found material packing fabric material packing :
- Cut away view explore :
- Ergonomic modeling :
- Anthropometric data :
- Construction kit :
- Structure mechanism hydraulic system :
- Computer assisted :
- Music subsystem :
- Presenting your product idea :
- Using isometric view :
- task testing 3 varieties of ice cream drawing a frame around or image :
- Rectangular place in to a real environmental :
- ----------

- Presenting your idea in a context, putting perspective draw :
- Draw line vanish department room :
- Display and exhibition :
- Presenting model prototype :
- Mounting a display surface working :
- Presentation report document :
- Written material using computer hand written layout information for making :
- Producing resistant material manufacture board word :
- MARKING OUT AND CHECKING THAT IS CHECK :
- MARKING MARS MARKING OUT LINE PARALEELE :
- Trimming cutting word to making farning sheet material thermoing :
- Casting metal using machine tools cad :
- Mourning describing part, pva synthesinsing p : plastic marks requirement cut around glue and plying heat peace when is cool using low temperature molding material vacuum forming thermoplastic
- Forming sheet aluminum alloy or copper by hold :
- Casting metal using machine tools using computer control tools cad :
- joining describing pva , synthesis exposition fitting screw , panel pin staples :
- Way of joining but joint brazing and joined :
- Brazing and joined solving material to be joined solding :
- Cleaning wood plastic varning enameling deep coating :
- Construction, technical edge cards :
- Mechanism movement line rotation a reciprocal oscillation :
- Metal turning :
- How to down material tools men machine power of man basic structure human muscular :movants weep muscular movement wrap basic shapes off forms
-
- ---

RADIO SET BUILDING CONSTRUCTION PROJETION BEGGINEERS JUNIOR BUILDING PLANTIF

-**EASY MADE ACCESS MS,, VISUAL BASIC,, JAVA SCRIPY**

- **INTRODUDTION , TO DATABSE , QBASIC, ADABS** :
- -adabs the storage of data :
  The associate and work, to file of adabs :
-
  Access logic: :
-
  Database modification and transaction handling :
-
  Introduction to natural : :
-
  Defining data : :
-
  Basic report writing : :
-
  Edit mask : :
-
  Arrays: :
-
  Arithmetic operation : :
-
  More advanced writing :
-
  Conditional statement for data manipulation : :
-
- ----------
  A data definition modulation : :
-
  B. nature system command : :
-
  C. nature system variable : :

- D. nature session parameter : :
- E. nature system function : :
- F. input statement parameter :
- G. data area editor :
- H . program editor :
- I map editor :
- ---
  Database dbms: :
- Sharing of files:
- Data available
- Duplication of data occurrence
  Data processing: :
- Database relate files on data of on organization dbms , (dataset management system) :
- Is the interface programed :
- Data store :
- Network model:
  Hierarchical data model:
- The architecture of adase components of adabse , adabs : component on disk :
- Association to control information on user data and the data :
- Work : to store temporarily and :
- Data : where user data is store :
- Data stored : divided , block , page :
- Database component uniquement block number , block number transfer from disk to memory record maximum :
- The maximum :
- nuclear: set of program control :
-

the database : actual data , parallel processing : actual data ,multiprocessor :

- optimized: processing : the i/o buffers is checked the block already , no physical i/o:
- controlled, usage :
- sql: Cobol pl stand :
- the storage of data disk pack pc: network <<files and field:, database,, max of 255 file consisted of set of record internal sequence number :
- - array :
- Mu , a single field report number , id :
- How are files report number id :
- How are fields
- Defined prediction

CUMMIN G	NU M	ISN- LIST	

THE address converter : used

Field (ty)- :

-

Blank : elementary field :

-

G: group item :

-

- M : multiple value field array on elementary level :

P : periodic group array :

-

- ----------

Level number (L) I and :

-

- Periodic declared

Field database field name : :

-

Alphanumeric 3 maximum :

-

Format : length :

-

A . alphanumeric ,, 1-253 character :

-

4 , unpacked decimal ,, 1-29 decimal :

-

Packed decimal ,, 1-15 decimal :

-

B. binary ,, ! 1-26 byte :

-

i.. integral ,, 4 byte :

-

- data definition : model (DDM)

_ADACMP GENERATE :

-

- DDM:

- ----------

Suppression store :

-

Record block >>:

-

Numeric field : IL B :

-

Alphanumeric :

-

Compression of null volume :

-

Compression fixed memory: :

-

Controlling the physical organization: :

-

Association and work – file of :

-
  Free space table , controlling access to data : :
-
  Inverted list : sequence accord, value , entry :
-
  Inverted list for description summaries :
-
- - specific record on the database be located .
  ----------:
-
  Process of locating record : component : visit library : :
-
  Step visit librarian (ADBA NUCLUAERS) :
-
  AFTER TELLING WHICH BOOK (RECORD) REQUIRE WORK >>, in the database store :
-
  Exact log shelf (rabn) of the record :
-
  Finally the library :
-
- The adabs work file :
  Work area temporary :
-
  Read in physical sequence : record block are not access in array key sequential :
-
  Read in logical sequence in inverted list , address converted retrieiewing process : :
-
  Hold start a logical : transactions , ,,use 1, cancel,, da, read, employee, files with hold , leave =5,update file leave =0 release record , :
-
  User 2, reserve 15 days , out until record that is held has been released , read employed, file with leave =0, update files ,leave=15. :
-
  Transaction conception : t service commanded change data system, time limited , reject of transact , recovery of the program :
-
- ---
- Define data local :
